Did You Know

- that Health Probe® will capture your signature and print it or email it encrypted? The signature is saved on your computer for that print session only and will be erased when done.
- that with Health Probe® you may see all your outstanding orders and the associated images with just a click? This powerful feature saves lots of your valuable time.
- that Health Probe® will print missed appointment letters with just one click? No more shuffling through the calendar to find out who didn't show up for their appointment.
- that you may see or print your daily schedule in an organized and easy to read order? No more eraser marks or whiteouts!

Health Probe® has converted to SQL.

For the past two years we have been converting our program to a new powerful database engine relying on SQL (Structured Query Language). After extensive beta testing of the software we have successfully converted a number of our current users to this new software. Our goal is to have all of our users up and running on SQL by the end of 2004. We are very excited about converting to this new version of the program for several reasons. Firstly, SQL is the standard database now used by software engineers. SQL makes the program faster, more secure and reliable. Backing up your data or restoring is made easy (only a few clicks) with SQL. It allows for the implementation of more exciting features and it is scalable, meaning that it can take on more users without compromising the speed or security of the program. Converting your office to SQL is very easy. If your maintenance subscription is current you will receive the **free** upgrade. To learn more about SQL give us a call at 303-449-7441 or drop us an email at sales@healthprobe.com.

Health Probe® will be attending the 17th Annual AAFP World Conference of Family Doctors in Orlando, FL this October.

Come see and experience Health Probe® in person at the 17th annual AAFP World Conference of Family Doctors this October 14th—16th in Orlando, Florida (Booth # 2175). Five of our team members will be there to demonstrate the program to doctors who are looking to purchase an integrated electronic medical records software for their office. We will be able to answer any questions directly and let doctors try Health Probe® hands on.

If you would like to learn more about this event just give us a call at 303-449-7441 or write us an email at sales@healthprobe.com

To learn more about the assembly visit these websites: www.aafp.org/assembly.xml or www.wonca2004.org.

Health Probe® is a proud member of the AAFP's *Partner for Patients* program to provide affordable, high quality Electronic Medical Records to physicians.

Welcome to a new team Member!

We would like to welcome Krystyna Kowalska to our team. Krys is part of the marketing department and she is adapting fast to all of her new tasks and responsibilities. She was born in Poland but she has lived in America for more than half her life and says this is where her heart really is. We are very excited about her joining our team and we are looking forward to working with her.

Empower your practice
visit our website at
www.healthprobe.com

All of our great improvements to the program come from our users and their ideas. If you have a suggestion that you think might help improve the program don't hesitate to let us. We want the program to serve you and make you and your staff happy.

Use Health Probe® to Access All Your Internet Needs

Now you can easily access the internet without exiting the program. This new feature, an exciting addition to the program that has proven a great success among our users, lets you access the internet with just one click. All you need is an internet connection and you can have the World Wide Web at your fingertips! With this feature you can check for the latest updates of the program, access the most common medical websites or Google your way around. You may also use this feature

to do reference searches on medicines, diagnoses or orders. While viewing reference screens of orders, diagnoses and medicines, you may select the item and launch an Internet Search. For medicines and diagnoses, an extra window will appear with additional modifiers to narrow the search. A blank line is available to add additional modifiers. We hope you will enjoy this new exciting feature and make full use of it. If you have any questions, please don't hesitate to ask.

Benefits of using your EMR software...

Independent research and user experience suggest that the use of EMR systems can help organizations save money and can be used as sources of new revenue. One of the main benefits of EMR is eliminating many clerical and labor costs. Healthcare organizations can save literally hundreds of thousand of dollars by not having to hire special staff for chart pulling and organization.

Another area where doctors spend lots of money is transcriptions costs. Doctors spend thousands of dollars each month just to have the patient records transcribed. So, make sure not to hand write your notes and save big bucks by doing so! If you have any great suggestions for our users or us just drop us an email. We would love to hear from you!

President promotes EMR!

At conferences in Nashville and Baltimore President Bush has been promoting the use of Electronic Health Records by doctors all over the country. The president has set a goal of making sure that most Americans have electronic health records within the next 10 years. Bush wants a computerized nationwide system of patient records that links hospitals, pharmacies and other medical providers. He said the system would improve health care, reduce errors and lower costs. That is why it is so important for **Health Probe** to stay on top of any technological, rules

and regulation changes as well as, the needs and demands of our customers. We want you and your practice to be not just current but ahead of the game. So, if you have not updated your software for a while maybe it is time to give us a call. We want your practice to be successful and unbeaten. Make sure your software is up to date and that your equipment is compatible with today's standards. Give us a call (765) 342-9947 or drop us an email at support@healthprobe.com if you have any questions or concerns.
